

MACE WINDU'S MANTIS SPEEDER!

Taken from a Separatist stronghold and customized for a Jedi pilot, the Mantis-class airspeeder has served Mace Windu on many undercover missions for the Galactic Republic. The Jedi Master relies on its powerful repulsorlift engines and hidden proton rockets to help him enter hostile territory and destroy every enemy droid on the battlefield.

You can build Mace Windu's Mantis Speeder using pieces from 8018 and 8019!
